FROM OUR ROYAL-LITES

SEED PROPAGATION

SWEET PEPPER MAXIBEL

'Meeting the farmers' expectation'

Having assessed the farmers' expectations, the Royal seed team launched an early maturing high yielding pepper-**MAXIBEL**

A product that performs well both under irrigation and rain-fed Agriculture.

Key attributes:

- Standard glossy green blocky fruits
- Early maturing and high yielding
- Deep green coloured fruits
- Long shelf life

Tolerance:

- Tobacco Mosaic Virus (TM1)
- Purple Blotch Tolerance

To benefit from the low-lying fruits, Royal Seed Ltd, has not been left behind in this fast-growing enterprise. We have established state of the art greenhouses with a carrying capacity of 0.5 million seedlings.

In our existence we have delivered most of the famous fast-moving products including :

- Tomato (Terminator F1, Rocky F1, Bravo F1, Gem F1, Susana F1),
- Cabbage (Pretoria F1, Fabiola F1, Kifaru Fi- Red cabbage),
- Capsicum (Maxibell, Buffalo F1, Kori F1 - Red, Minerva F1-Yellow),
- Leafy vegetables (Kale 1000 Headed, Collard-Georgia, Spinach-Fordhook Giant, Lettuce),
- Pepper (Demon F1, Serenade, Habanero),
- Herbs (Rosemary, Basil, Dill, Coriander, Mint, Thyme, Chives),
- Pawpaw (Red Royale, Vega and Sinta).

FROM OUR ROYAL-LITES

FRENCH BEAN MOONSTONE

French beans form a major export crop to European Union market and also consumed locally.

Kenya Highland Seed has the best varieties which are Serengeti and Moonstone.

French beans are mainly grown in warm areas in Kenya.

They do well in well drained soils of a pH between 6.5 -7.5, temperature of 20-26 degree Celcius and annual rainfall of 900-1200mm.

French beans are grown from seeds with a spacing of 30 x15cm and matures from 55 to 60 days after sowing.

MOONSTONE: An extra fine/ fine bean

- Pod length:13-15cm
- Pod diameter: 6-8mm (30%), 8-9(70%)
- Maturity period: 55 days
- Good shelf life
- High yields potential
- Resistant to Rust

Common disease

Rust is the common disease affecting French bean crops in Kenya. Serengeti and Moonstone are the only varieties highly averse to this challenge, due to the fact that they can withstand high temperatures which are known to spur the rust.

FRENCH BEAN SERENGETI

SERENGETI:(A fine bean)

- Pod length:14-16cm
- Pod diameter: 6-8mm
- Maturity period: 55 days
- Good shelf life
- High yields potential
- Resistant to Rust
