

# SEED CATALOGUE

-  Hybrid Variety (F1)
-  Open Field Variety (OPVs)

# TOMATOES

## ROYAL 702 F1

An indeterminate hybrid suitable for greenhouse & outdoor farming

- Maturity: 75 days
- Fruit weight: 150–180 g, uniform large (7–8 fruits)
- Resistances: Bacterial Wilt, Fusarium Wilt, TSWV, Nematodes
- Harvest: 5–6 months

Pack Sizes (Seed count) 500 / 1000 seeds

Pack Sizes 10g / 25g / 50g / 100g

## SUSANA F1

An indeterminate hybrid suitable for greenhouse & outdoor farming

- Maturity: 60–75 days
- Fruit weight: 150–180 g, firm fruits (6–8 per cluster)
- Resistances: Fusarium Wilt, Vd, Va
- Harvest: 5–6 months

Pack Sizes (Seed count) 100 / 500 / 1000 seeds

## ROYAL 705 F1

Semi-determinate tomato with strong Bacterial wilt resistance

- Maturity: 75 days
- Fruit weight: 125–150 g (5–6 fruits)
- Resistances: Bacterial Wilt, TYLCV
- Harvest: 2–3 months

Pack Sizes 5g / 10g / 25g / 50g / 100g

## ROYAL 703 F1

Semi-determinate variety with tolerance to TYLCV

- Maturity: 75 days
- Fruit weight: 130–150 g (5–6 fruits)
- Resistances: TSWV, TYLCV, Fusarium
- Harvest: 3–4 months
- Can be planted without staking

Pack Sizes 10g / 25g / 50g / 100g

## RAMBO F1

A determinate hybrid tomato with strong resistance to Bacterial wilt

- Maturity: 75 days
- Fruit weight: 120–130 g with 5 to 6 fruits
- Harvest: 2–3 months (Under good management)
- Resistances: Bacterial Wilt (tolerant), Fusarium Wilt (Fol:1,2), Verticillium Wilt (Vd & Va), Bacterial Spot, Nematodes

Pack Sizes 2.5g / 5g / 10g / 25g / 50g / 100g

## RIO GRANDE

A dependable open-pollinated tomato with uniform medium fruits

- Maturity: 75 days
- Fruit weight: 90–100 g
- Resistances: Fusarium Wilt (Fol:1,2), Verticillium Wilt (Vd & Va)

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## TERMINATOR F1

A semi-determinate hybrid with strong resistance to TYLCV & ToMV

- Maturity: 70 days
- Fruit weight: 125–150 g (5–6 fruits)
- Resistances: TYLCV, Tomato Mosaic Virus, Grey Leaf Spot
- Harvest: 2–3 months

Pack Sizes 2.5g / 5g / 10g / 25g / 50g / 100g

## HARMONY F1

Semi-determinate hybrid with good resistance to TYLCV & Bacterial Wilt

- Maturity: 70–75 days
- Fruit weight: 160–170 g (oval, firm, bright red)
- Resistances: Bacterial Wilt, TYLCV

Pack Sizes (Seed count) 2000 / 5000 / 10000 / 25000 seeds

EAST-WEST SEED

# ONIONS & LEEKS

## RED PINOY

**An early maturing red onion with pungent bulbs and excellent shelf life**

- Maturity: 90 days
- Long shelf life: up to 6 months
- Resistances: Downy Mildew, Purple Blotch, Bolting & Splitting

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## SUPER YALI

**An early maturing red onion with pungent bulbs and excellent shelf life**

- Maturity: 90 days
- Deep red, pungent, excellent shelf life
- Resistances: Downy Mildew, Purple Blotch, Bolting & Splitting

Pack Sizes 100g / 250g / 500g / 1000g

## ROYAL RED SUPER F1

**A hybrid dark red onion variety known for early maturity, uniform bulbs, and high market value.**

- Maturity: 90 days
- Long shelf life: up to 6-8 months
- Deep red, strong pungency
- Resistances: Downy Mildew, Purple Blotch, Bolting & Splitting

Pack Sizes 25g / 50g / 100g / 250g / 500g / 1000g

## BOMBAY RED

**A mid-maturing red onion with pungent bulbs and excellent shelf life**

- Maturity: 110 days
- Bulb weight: 125–150 g
- Uniform globe bulbs
- Resistances: Pink Rot
- Heat tolerance

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## RED CREOLE

A mid-maturing red onion with medium pungent bulbs & good outer-skin retention

- Maturity: 110 days
- Good storage quality, deep red bulbs
- Adapted to diverse conditions
- Resistances: Bolting, Pink rot, Botrytis & downy mildew

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## TEXAS GRANO

A mid-maturing white onion with pungent bulbs and excellent shelf life

- Maturity: 110 days
- Long shelf life: up to 6 months
- Popular white onion in the market
- Resistances: Pink rot root

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## WHITE LISBON

A vigorous leek with long shank

- Maturity: 90 days
- Shank length: 30 cm, thick white stem
- Resistances: Rust & Purple blotch

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## ITALIAN GIANT

A hardy, quick-growing spring onion with tender stalks

- Maturity: 100 days
- Stalks: Pure white up to 50 cm
- Tender, delicious taste
- Resistances: Rust & Purple blotch

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# CABBAGES & BRASSICAS

## JABALI F1

An Intermediate hybrid cabbage with heavy compact semi-dome heads.

- Maturity: 75 days
- Head weight: 5 –6 kg
- Resistances: Fusarium Wilt, Yellow Leaf Virus, Black Rot

Pack Sizes (Seed count) 2.5 / 5g / 10g / 25g / 50g / 100g / 250g

## PRETORIA F1

A heat tolerant hybrid cabbage with heavy compact heads.

- Maturity: 75 days
- Head weight: 5 –6 kg
- Adaptability: Medium to Low altitudes
- Resistances: Fusarium Yellow

Pack Sizes (Seed count) 2500 / 5000 / 10000 seeds

Pack Sizes 5g / 10g / 25g / 50g / 100g / 250g

## FABIOLA F1

A hybrid soft cabbage producing large firm semi-flat heads.

- Maturity: 75–80 days
- Head weight: 5- 6 kg
- Excellent trapper leaves & excellent field holding capacity
- Resistances: Black Rot, Ringspot

Pack Sizes (Seed count) 2500 / 5000 / 10000 seeds

Pack Sizes 10g / 25g / 50g / 100g

## KIFARU F1

A red cabbage hybrid with firm uniform heads

- Maturity: 70–80 days
- Head weight: 1.2–1.5 kg
- Resistances: Fusarium Yellow

Pack Sizes (Seed count) 100 / 500 / 1000 seeds

## ESCAZU F1

NEW

An early maturing vigorous cabbage with high-yields and good disease package

- Maturity: 70 -75 days
- Head weight: 5 kg
- Excellent head cover and high yielding
- Shape: round

syngenta

Pack Sizes (Seed count) 2500 seeds

## COPENHAGEN

An early maturing cabbage with uniform heads for quick market

- Maturity: 65 days
- Head weight: 2.5–3 kg

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## GLORY OF ENKHUIZEN

A medium sized cabbage variety with good adaptability

- Maturity: 75 days
- Head weight: 2.5–3 kg
- Yield: 30–35 tonnes/acre

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## CHINESE CABBAGE MICHILI

An upright cylindrical variety with crispy sweet flavour

- Maturity: 45–50 days
- Head weight: 4 kg, cylindrical leafy head
- Resistances: Diamond Back Moth (DBM)

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## WHITE FORTRESS F1

(CAULIFLOWER)

A hybrid with dense white curds and strong leaf cover

- Maturity: 60- 70 days
- Head weight: 1 kg
- Heavy dense curds with good leaf cover

Pack Sizes  
(Seed count) 100 / 500 / 1000 / 2500 seeds

## GREEN PIA F1

(BROCCOLI)

An hybrid broccoli with compact heads & slow to bolting

- Maturity: 60 days
- Head weight: 600–800 g
- Resistances: Hollow core, Cat eye

Pack Sizes  
(Seed count) 100 / 500 / 1000 / 2500 seeds

# SWEET PEPPERS

## BALTA F1

NEW

A blocky hybrid pepper turning red at maturity suitable for green house production

- Maturity: 80-85 days
- Fruit weight: 230 g
- Large Blocky fruits in shape with 3-4lobes
- Harvest period: 6 – 8 Months
- Resistances: HR: PVY:0,1,2,Tm:0, IR:CMV/Lt/TSWV:0

syngenta

Pack Sizes (Seed count) 500 / 1000 seeds

## BUFFALO F1

A blocky hybrid sweet pepper variety suitable for both greenhouse & open field farming

- Maturity: 75-80 days
- Fruit weight: 220-240 g,
- Glossy dark green fruits, blocky in shape (4 lobes)
- Resistances: Tomato Mosaic Virus (L4)

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

Pack Sizes 5g / 10g / 25g / 50g / 100g / 250g / 500g

## CALIFORNIA WONDER

An open pollinated field sweet pepper variety with uniform fruits

- Maturity: 75 days
- Fruit weight: 100-120 g
- Resistances: Ring Spot, Black Rot

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## MAXIBELL

A high select sweet pepper variety with bell shaped glossy fruits

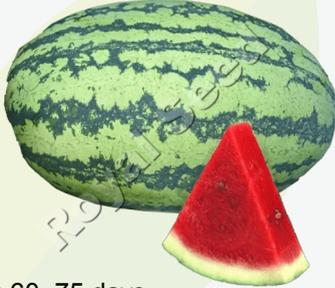

- Maturity: 75 days
- Fruit weight: 120-150 g
- Ideal for open field farming
- Resistances: Tobacco Mosaic Virus (TM1), Downy Mildew, Purple Blotch

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# MELONS

## SWEET QUEEN F1

A hybrid zebra type watermelon with very sweet taste & compact red flesh

- Maturity: 60–75 days
- Fruit weight: 12–15 kg
- Sugar: 13–15% Brix
- 2-3 uniform fruits per plant
- Resistances: Fusarium Wilt, Anthracnose

Pack Sizes 5g/ 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## ASALI F1

A hybrid watermelon variety with sweet compact red flesh

- Maturity: 85 days
- Fruit weight: 10–12 kg
- Excellent storage & transport
- Resistances: Fusarium Wilt, Anthracnose

Pack Sizes 5g/ 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## SWEET MELON GALIA F1

A hybrid honeydew sweet melon type with high fruit uniformity

- Maturity: 65–70 days
- Fruit weight: 1.25–1.5 kg
- Flesh Colour-light green with a yellowish-brown rind on the surface
- Resistances: Fusarium Wilt, Anthracnose

Pack Sizes 5g/ 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## MUSKMELON SSB 644 F1

A hybrid cantaloupe melon type with high uniform fruit & excellent transportability

- Maturity 85- 90 days
- Fruit weight 1.2 – 1.5kg
- Flesh Colour-Orange with dense netting on the surface
- Resistances: Fusarium Wilt & Cucumber Mosaic Virus

Pack Sizes 5g/ 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## CANTALOUPE HALES BEST

A hales best jumbo melon type with high uniform fruit & excellent transportability

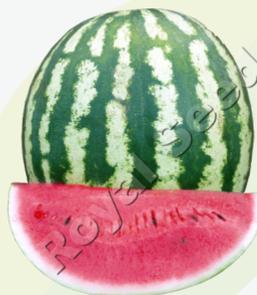

- Maturity: 80–85 days
- Fruit weight: 1.1–1.4 kg
- Flesh Colour-Orange with uniform light netting on the surface
- Resistances: Fusarium Wilt

Pack Sizes 5g / 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## CRIMSON SWEET

A watermelon variety with uniform blocky round fruits

- Maturity: 85 days
- Fruit weight: 8–10 kg
- Flesh Colour- deep red
- Resistances: Fusarium, Anthracnose

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# LEAFIES & INDIGENOUS

## MALKIA

An early maturing variety that produces large sized leaves with excellent leaf quality and attractive green colour

- Excellent yield potential, large leaves
- Palatable & Tender leaves
- Average leaf weight: 39.2gms/leaf
- Plant: Excellent leaf cover and high yielding

**syngenta**

Pack Sizes (Seed count) 1000 / 2500 seeds

## SUKUMA SIKU

A vigorous plant with soft textured tender leaves.

- Maturity: 45 days
- Continuous harvest of up to 4–5 months under good management
- Resistances: Diamond Back Moth

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## FORDHOOK GIANT

**Swiss Chard)**

A farmer-trusted Swiss Chard with excellent heat resistance and continuous production.

- Maturity: 60–70 days
- Plant height: 65 cm, dark green large leaves
- Strength: Reliable under hot conditions with heavy crumpled leaves

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## SUKUMA MATUMBO

An early, tender kale variety producing palatable serrated leaves

- Maturity: 40–50 days
- Excellent heat tolerance
- Resistances: Black Rot

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## SOUTHERN GEORGIAN

A dependable dark-green leafy variety with heavy ribs and spreading leaves. Well-suited for farmers targeting a strong fresh market demand.

- Maturity: 60 days
- Plant type: Loose-headed, determinate, leafy
- Strength: Reliable uniformity and adaptability for consistent harvests

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## KALE - THOUSAND HEADED

A vigorous kale with continuous picking and strong recovery, ensuring long harvests and steady income.

- Maturity: 60 days
- Yield: 8 tonnes/acre
- Trait: Very hardy with strong side branching
- Strength: Heat tolerant with ability to recover after stress

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## ETHIOPIAN KALE (IMPROVED)

A nutritious leafy green with high yields and strong adaptability

- Maturity: 40-50 days
- Tender, nutritious leaves

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## JUTE MALLOW (MRENDA/ MURERE)

A drought-tolerant leafy vegetable with excellent yields

- Maturity: 40-45 days
- Drought tolerant, nutritious

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## SPIDER PLANT

(SAGA)

A indigenous leafy vegetable with high nutritional and market value

- Maturity: 35–45 days

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## BLACK NIGHTSHADE

(MANAGU MNAVU)

A fast-growing indigenous leafy vegetable with high nutritional value

- Maturity: 35–45 days

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## GIANT NIGHTSHADE

(MANAGU)

A robust indigenous variety of nightshade producing larger leaf yields

- Maturity: 35–45 days

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## AMARANTHUS DUBIOS

(TERERE)

A indigenous Terere variety with tender leaves and short maturity

- Maturity: 35–45 days

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# BEETROOTS & OKRA

## CRIMSON GLOBE

A uniform beetroot variety with smooth round roots and deep red colour

- Maturity: 75–90 days
- Root: round, deep red
- Resistances: Leaf spot, Downy Mildew

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## DETROIT DARK RED

A quick-maturing beetroot with uniform roots and consistent colour

- Maturity: 60–65 days
- Root: uniform dark red, globe shape

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## PUSA SAWANI

A classic OP okra variety with strong adaptability and virus tolerance.

- Maturity: 40–45 days
- Trait: Slender, attractive pods with good storage
- Strength: Tolerant to YVMV and widely adaptable to warm regions

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## CLEMSON SPINELESS

A prolific and uniform producer with tender, spineless pods for easy harvesting.

- Maturity: 70 days
- Pod length: 16 cm
- Strength: Reliable productivity with high farmer acceptance

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# EGGPLANTS & CARROT

## BLACK BEAUTY

A popular OP eggplant with long picking periods and excellent taste.

- Maturity: 90 days
- Yield: 8–16 tonnes/acre
- Trait: Bushy plant with egg-shaped fruits
- Strength: Long harvesting ability (up to 6 months)

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## LONG PURPLE

Tall and upright with slender fruits and excellent taste, making it highly marketable.

- Maturity: 85 days
- Yield: 8–16 tonnes/acre
- Strength: Strong demand due to flavour and fruit quality

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## BLACK ROUND

A high-yielding round-fruited eggplant with good disease tolerance.

- Maturity: 80–85 days
- Fruit weight: 300–400 g
- Yield: 8–16 tonnes/acre
- Strength: Round shape, attractive dark purple colour, consistent production

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## NANTES

A carrot variety with uniform roots and deep orange colour.

- Maturity: 110 days
- Length: 17–20 cm, deep orange colour
- Resistances: Powdery Mildew

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# LETTUCES

## CORBANA F1

(ROMAINE)

**A Romaine lettuce variety suitable for both open field & hydroponics farming**

- Maturity: 40–50 days
- Resistances: Tip burn, bolting, Lettuce Mosaic Virus,
- Downy Mildew (Bl:29- 41EU/Bl:1-9US), Fusarium wilt

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

## LOBELA F1

(BUTTER HEAD)

**A butter head lettuce variety suitable for both open field & hydroponics farming**

- Maturity: 40–50 days
- Resistances: Tip burn, Lettuce Mosaic virus, Downy Mildew (Bl:29-41EU/Bl:1-9US), Lettuce leaf aphid (Nr:0) & Lettuce root aphid (Pb)

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

## LUDMILA F1

(ICEBERG)

**An iceberg lettuce suitable for both open field & hydroponics farming**

- Maturity: 40–50 days
- Well filled heads
- Resistances: Tip burn, Downy Mildew (Bl:29-41EU/Bl:1-9US)

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

## TUSKA F1

(LOOSE LEAF)

**A Lollo Rossa lettuce variety with excellent field holding capacity**

- Maturity: 40–50 days
- Fine curls with beautiful cherry red colour
- Resistances: Bolting, Downy Mildew (Bl: 29-41EU/Bl: 1-9US), Lettuce leaf aphid (Nr: 0)

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

## CAIPIRA F1

(LOOSE LEAF)

*A Lollo Rossa lettuce variety suitable for both open field & hydroponics farming*

- Maturity: 40–50 days
- Resistances: Tip burn, Lettuce Mosaic virus, Downy Mildew (BI:29-41EU/BI:1-9US), Lettuce leaf aphid (Nr:0) &
- Lettuce root aphid (Pb)

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

## MICHELAGIO F1

(LOOSE LEAF)

*An open field loose leaf lettuce variety with excellent field holding capacity*

- Maturity: 40–50 days
- Curly leaves with beautiful vibrant green colours
- Resistances: Bremia lactucae (BI) 16-33 & Nasonovia ribisnigri (Nr)

Pack Sizes (Seed count) 100 / 500 / 1000 / 5000 seeds

## GREAT LAKES

(ICEBERG)

*An iceberg lettuce sow to bolting*

- Maturity: 40–50 days
- Resistances: Slow to bolting

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# PAPAYAS & BITTER GOURD

## VEGA F1

A semi-dwarf hybrid with sweet red flesh and good fruit setting.

- Maturity: 8–9 months
- Fruit: 1–1.2 kg, 12 - 14% Brix
- Strength: High yield and strong adaptability

Pack Sizes (Seed count) 10/ 50/ 100/ 1000 seeds

## RED ROYALE F1

A vigorous hybrid with thick-stemmed plants and excellent fruit quality.

- Maturity: 8–9 months
- Fruit: 1.7–2.3 kg, sweet red flesh
- Strength: Strong virus tolerance and heavy setting

Pack Sizes (Seed count) 10/ 100 seeds

## SINTA F1

A high-yielding semi-dwarf hybrid with long harvest potential.

- Maturity: 270 days
- Fruit: 2 kg, 14% Brix

Pack Sizes (Seed count) 10/ 100 seeds

## PALEE F1

(BITTER GOURD)

A high-yielding bitter melon with strong disease tolerance and long green fruits.

- Maturity: 90–120 days
- Fruit: 20–25 cm, 100–140 g
- Strength: Excellent shelf life and nutritional value (rich in Vitamin C & minerals)

Pack Sizes 50g

# CORN, MAIZE & BEANS

## SG 18 BABY CORN

A supermarket favourite hybrid with high yield and Uniform pale-yellow cobs

- Maturity: 52-59 days
- Cobs: 2-3 per plant
- Resistances: GLS, MSV
- Strength: Long shelf life, no tip damage, suitable for fresh & processing market

Pack Sizes 1kg / 5kg

## MAIZE RS 5101

A drought -tolerant, double cobbing maize ideal for green and grain harvest

- Maturity: 90 days (green), 142 days (grain)
- Yield: 21-42 bags/acre
- Resistances: GLS, MSV
- Strength: Strong roots, no lodging, adapted to low-mid altitudes

Pack Sizes 1kg / 2kg

## HYBRIX F1

### (SWEET CORN)

A very sweet hybrid with golden-yellow cobs, excellent for fresh and processing markets.

- Maturity: 55 days
- Trait: 2-3 cobs per plant, 20cm cob length
- Strength: Sweet taste, good shelf life, resistant to major foliar diseases

Pack Sizes 50g / 100g / 250g / 500g / 1000g

## NYOTA BEANS

A drought -tolerant and suitable for arid, semi arid and highland area

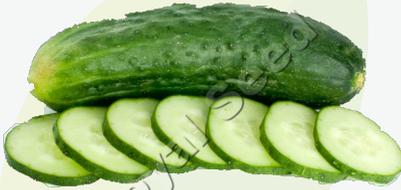

- Maturity: 70 - 75 days
- Cooks faster than most bean varieties
- Good for making flour
- zero acidity
- Rich in iron & zinc

Pack Sizes 1kg / 2kg / 5kg

# CUCUMBERS & SQUASH

## ASHLEY

A versatile slicing cucumber ideal for both open field and greenhouse farming.

- Maturity: 50–60 days
- Fruit: Uniform, blocky, 19–21 cm long
- Strength: Adaptable, with intermediate tolerance to Downy Mildew

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## GS 18 - 415 F1

A high-yielding parthenocarpic cucumber requiring no pollination — ideal for intensive systems.

- Maturity: 55–65 days
- Trait: Heavy fruiting, 230–240 g
- Strength: Excellent disease tolerance package (CMV, CVYV, Px, Pc)

Pack Sizes 100 / 500 / 1000 seeds

## AFRODITE F1

A medium -dark green cylindrical hybrid traditional variety for open field cultivation

- Maturity: 40–45 days
- Fruit: Medium -Dark green, uniform cylindrical shape
- Plant vigour : Erect leaves, Open plant.
- Shelf life: Good & Attractive quality
- Resistances: IR: CMV/ WMV / ZYMV

syngenta

Pack Sizes 500 seeds

## CASH MACHINE F1

(ZUCCHINI)

A vigorous zucchini hybrid with excellent yield and virus resistance

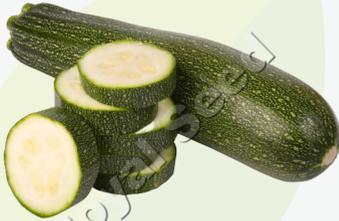

- Maturity: 40–45 days
- Shelf life: Excellent
- Resistances: Powdery Mildew, ZYMV, WMV, PRSV

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## GREEN ZUCCHINI

(ZUCCHINI)

*An early, prolific zucchini with uniform fruits for continuous harvest*

- Maturity: 45 days
- High productivity

Pack Sizes 10 / 25 / 50 / 100 / 250

## WALTHAM

(BUTTERNUT)

*A sweet, long-storing butternut with uniform fruits and good flesh quality*

- Maturity: 90–100 days
- Shelf life: up to 6 months
- Fruit: uniform, orange flesh, 220–240 g

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

## ARJUNA F1

*A large hybrid pumpkin with sweet flesh and good keeping quality*

- Maturity: 90–100 days
- Fruit weight: 4–5 kg
- Shelf life: 4–6 weeks
- Yellow-orange flesh, excellent taste

Pack Sizes (Seed count) 10 seeds

Pack Sizes 10g

# HOT PEPPER

## FAIDA F1

NEW

A very high-yielding hybrid pepper with tolerance to diseases and sucking pests.

- Maturity: 65–70 days
- Pods: 15–16 cm, medium pungent
- Strength: Strong vigour and excellent shelf life

Pack Sizes  
(Seed count)

## LONG CAYENNE

A heat-tolerant, mild-hot variety for open field farming.

- Maturity: 75 days
- Pods: 10 × 1 cm, thin-walled, medium red at maturity
- Strength: Excellent adaptability with consistent yields

Pack Sizes

10g / 25g / 50g / 100g / 250g / 500g / 1000g

## DAIYA 619 F1

A compact hybrid with downward-bearing pungent fruits, ideal for intensive production.

- Maturity: 60–65 days
- Fruit size: 5–6 cm long, 0.9 cm diameter
- Strength: Compact, uniform plants with good disease tolerance

Pack Sizes

## SAIDAH F1

NEW

A kimichi hot pepper with good plant vigour yield performance & disease resistance

- Maturity: 65–70 days
- Fruit length: 15 cm long
- Fruit shoulder 2 cm diameter
- Plant vigour & pungency: strong
- Resistance: IR Lt; HR: PVY: 0/TM: 0

Pack Sizes  
(Seed count)

500 / 1000 seeds

syngenta

## RED DEMON F1

A vigorous hybrid with highly pungent bright red fruits and long harvest window.

- Maturity: 70 - 75 days
- Yield: 6 - 7 tonnes/acre
- Strength: Reliable under field conditions with good disease tolerance

Pack Sizes 5g / 10g / 25g / 50g

## LONG CAYENNE F1

An improved very hot cayenne with excellent uniformity and shelf life.

- Maturity: 75 days
- Pods: 8 -10 cm, slim and very pungent
- Strength: Tolerant to TMV, long storage ability

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# HERBS

## BASIL SWEET CN GB 5003 F1

A hybrid Genovese-type basil with improved handling and strong uniformity.

- Trait: Pointed leaves, slow to flower
- Strength: Broad Fusarium wilt tolerance, excellent aroma

Pack Sizes 10g / 25g / 50g / 100g / 250g

## DILL DUKAT

A market-standard dill with high essential oil content and adaptability.

- Height: 80 cm
- Strength: Widely grown, vigorous, high flavour quality

Pack Sizes 10g / 25g / 50g / 100g / 250g

## CORIANDER

A farmer's staple herb with strong aroma and wide cooking use.

- Maturity: 45–60 days
- Height: 50 cm
- Strength: High market demand, broad adaptation

Pack Sizes 10g / 25g / 50g / 100g / 250g / 500g / 1000g

# PEAS

## ITALIAN WONDER PEA

A high-yielding pea adapted to all growing zones with big peas and strong demand.

- Maturity: 65 days
- Pods: 10 cm, 8–9 seeds each
- Strength: Wide adaptability with big-sized peas

Pack Sizes 1kg / 1 Bag

## SOMERWOOD

A stress-tolerant variety with consistent pod size and yield.

- Maturity: 75 days
- Pods: 10 cm, 9 seeds each
- Strength: Strong stress tolerance and uniform pods

Pack Sizes 1kg / 1 Bag

## GREEN FEAST

A standard variety with dark green pods and excellent adaptation to warm climates.

- Maturity: 75 days
- Pods: 10 cm, 9 seeds each
- Strength: Very high yielding, reliable in heat

Pack Sizes 1kg / 1 Bag

## CASCADIA

(Snap Pea)

A uniform snap pea with attractive dark green pods, suited for warm climates.

- Maturity: 75 days
- Pods: 8 cm
- Strength: Reliable pod uniformity with powdery mildew tolerance

Pack Sizes 1kg / 1 Bag

## SWEET HORIZON

A semi-stringless snow pea with strong plant vigour and high yields.

- Maturity: 72 days
- Pods: 9–10 cm, straight and dark green
- Strength: Export market suitability, powdery mildew tolerance

Pack Sizes 1kg / 1 Bag

## OREGON SUGAR POD II PEA

A heat-tolerant snow pea with uniform dark green pods.

- Maturity: 72 days
- Pods: 9 cm, flat, vigorous plants
- Strength: Consistent under warm conditions

Pack Sizes 1kg / 1 Bag

# FRENCH BEANS

## ALBATROS BEAN

NEW

A very fine variety with dark green glossy pods, excellent shelf life ideal for local and export market

- Maturity: 55 - 60 days
- Pod length 13.5 - 16 cm
- Pod diameter: 6-8 mm 30%, 8-9 mm 70%
- Specs: 70% VF(<7.5mm)/ 30% FL (<9mm)
- Strong plant vigour with sturdy bush structure
- Resistance: IR: Rust, HR: Anthracnose

Pack Sizes (Seed count) 100,000 / 500,000 seeds

## BALOZI BEAN

A fine bean variety with superior pod quality & ideally suited for fresh market production

- Maturity: 60 days
- Pod length 14 - 15 cm
- Specs: 70% VF(<8mm), 30% FL (<9mm)
- Plant habit: medium erect bush
- High tolerance to BCMV/V1: 1/PsP 1,2
- Intermediate tolerance to Ua (Bean Rust)

Pack Sizes (Seed count) 100,000 / 500,000 seeds

## MOONSTON BEAN

An extra fine/ fine bean with a concentrated pod setting, suitable for handpicking

- Maturity: 55 days
- Pod length 13 - 15 cm
- Pod diameter: 6-8 mm 30%, 8-9 mm 70%
- Pod colour: Uniform dark green glossy
- Plant habit: medium erect bush
- Resistance: Rust, bean common, Mosaic, Psp

Pack Sizes (Seed count) 100,000 / 500,000 seeds

## TURACO BEAN

A vigorous French bean well adapted to heavy soils and hot climates.

- Pod length: 13–16 cm, 6.5–7 mm diameter
- Strength: Strong adaptability with high yield under warm conditions

Pack Sizes (Seed count) 100,000 / 500,000 seeds

## BOSTON BEAN

A hardy French bean suited to warmer regions with reliable performance.

- Maturity: 56 days
- Pods: 14 -16 cm, uniform dark green
- Resistances: BCMV, Anthracnose
- Strength: Consistent yields, heat adaptation

Pack Sizes (Seed count) 100,000 / 500,000 seeds

## SERENGETI

A early maturing fine bean with concentrated pod set & good shelf life

- Maturity: 55 days
- Pods: 14 -16 cm, uniform dark green glossy
- Pod diameter 6 - 8 mm,
- Pod shape: Circular & straign
- Strength: Consistent yields, heat adaptation
- Resistances: BCMV, Anthracnose

Pack Sizes (Seed count) 100,000 / 500,000 seeds

## LAVEZI BEAN

A premium extra-fine bean suitable for warm areas with attractive straight pods.

- Pods: 12.5 -13.5 cm, 6 - 6.5 mm
- Resistances: Rust, BCMV, Anthracnose, Halo Blight
- Strength: Export-grade uniformity with strong performance

Pack Sizes (Seed count) 100,000 / 500,000 seeds

# GRASSES & FORAGE

## MOMBACA GRASS

A tall, leafy grass with high-quality feed and excellent drought tolerance.

- Strength: Very high production potential and palatability

Pack Sizes 1kg

## SORGHUM SUDAN GRASS

A fast-growing forage with high protein and digestibility.

- Strength: High yield, quick regrowth, resistant to root-knot nematodes

Pack Sizes 1kg

## KIKUYU GRASS

A vigorous perennial grass ideal for erosion control and grazing.

- Strength: Drought tolerant, quick recovery after cutting, weed suppression

Pack Sizes 1kg

## BRACHARIA GRASS

A leafy perennial grass with high nutritional value and erosion control benefits.

- Strength: Drought tolerant, adapts to acidic soils, suppresses weeds

Pack Sizes 1kg

## RHODES GRASS

(KATAMBORA)

A drought-tolerant, fast-growing grass with excellent grazing and silage potential.

- Maturity: 85–100 days
- Strength: Quick establishment, good soil cover, high nutrition

Pack Sizes 1kg

## LUCERNE/ ALFALFA

A premium high-protein forage legume with fast recovery after cutting.

- Strength: 18 - 25% crude protein, tolerant to major pests and Fusarium Wilt

Pack Sizes 50g / 100g / 250g / 500g / 1000g
