

## Wambugu Farm ATC Event: A Success Story for Royal Seed

Last month, we participated in the Wambugu Farm Agricultural Training Centre (ATC) event in Nyeri County, showcasing some of our best produce grown from our high-quality seeds. The event was an excellent opportunity for us to interact with farmers, extension officers, researchers, and other stakeholders in the agricultural sector. We also learned a lot from the feedback and suggestions we received from the attendees.

The Wambugu Farm ATC event was held on the 28th and 29th of July, attracting hundreds of visitors from different parts of the country. The Ministry of Agriculture, Livestock, Fisheries, and Cooperatives organized the event with various partners, including Royal Seed. The event's main objective was to promote modern farming technologies and practices that enhance food security, income generation, and environmental conservation.

As Royal Seed, we proudly display some of the finest products we have developed through years of research and innovation. We showcased the following products:

Our stand was one of the most outstanding!

**Waltham Butternut:** A superior butternut that is highly nutritious, 10 seeds per gram, 500g per acre, spacing of 100 x 100cm  
Characteristics: Characteristics:  
• Maturity 90-100 days after planting  
• Yield potential 5-6 tonnes per acre

**Pretoria F1 Cabbage:** A hybrid fresh market cabbage with excellent heat tolerance, 75grams per acre with a spacing of 45 by 45cm or 60 by 60cm  
Characteristics:  
• Excellent field holding capacity  
• Maturity 75 days from transplanting
